COMFORT

Adding as little as 2 to 3 percent of Lycra® to cotton or wool allows socks to acquire superior staying power and ultimate stretch. This assures superior wear, comfort, excellent size stability and uniform appearance. Socks with Lycra® retain their size and shape after repeated wear and laundering.

Cotton is a soft, natural fibre that absorbs moisture easily and draws heat away from the skin to keep you cool, making sock comfortable to wear. It can absorb up to one fifth of its weight in water before it feels damp. The fabric doesn't irritate skin or cause static electricity.

Phoenix Yarn® is a new recycled and environmentally friendly polyamide. It is soft with a silky touch and makes your feet comfortable and cozy in all levels of activity.

INSULATION

The highest, finest type of wool obtainable. It does not itch and is shrink treated to hold its size and shape.

Known as "Synthetic Down", Primaloft® provides an equally efficient thermal barrier and have improved wetting and drying characteristics, while offering a superior insulation when wet comparing to a real down.

MOISTURE MANAGEMENT

Polypropylene Isofil® fibres have the lowest thermal conductivity of all the other fibres. Its unique vapour transfer ability (wicking) moves perspiration quickly and naturally away from the body to the outside where the moisture then evaporates. It's durable, easily washable and odour-free.

100% polyester, it guarantees an improved comfort doing sport. It facilitates transfer of perspiration and sweat evaporation, keeping a soft and pleasant handle with a fresh feeling. It's easy to care: easy washing, drying and ironing and has "wrinkle free" characteristics.

Microfibers Nylon are exceptionally strong although super fine filaments. They are durable, light, breathable and offer the same comfort of natural fibers.

Fulgar's EVO® is a next-generation hi-tech yarn. It is one-of-a-kind and of bio-based origin, ensuring comfort and efficiency, whilst respecting Nature. It delivers odor control, thermo isolation and extra rapid drying.

Dryarn® is a high-performance fibre, an innovative yarn designed for socks and apparel that are practical and comfortable to wear. Lightweight, insulating, breathable: Dryarn® is the athlete's best performance enhancer.

DURABILITY

Nanoglide® significantly reduces friction between the sock and the skin, eliminating blisters and irritations, and guaranteeing the comfort and performance that an active person demands.

MISC

T-CARE PLUS

T-CARE®Plus is a 90% pre-consumer recycled nylon 6 mixed during the spinning phase with a special bacteriostatic product, with a permanent anti odor action.

The Resistex® Bioceramic yarn, thanks to the presence of the minerals contained within it, is able to absorb and reflect the heat of the human body. Bioceramic offers a high level of thermal insulation which maintains the body temperature constant, even in cold environments.

Grip yarn is a special kind of (credo poliestere ma per favore chiedi a Francesca) which maximises the grip both inside and outside and keeps the foot from slipping.

COOLING

NILIT® BREEZE

Breeze is a soft, lightweight yarn that provides a sense of being cool, dry, and comfortable. Its ultra-soft hand feel provides a smooth sensation on the body, while its efficient ventilation property facilitates an optimal physical performance.
